

Olga Petrenko

Machine Learning Engineer

Almaty, Kazakhstan • olga.petrenko.ml@gmail.com • +7 707 555 32 11 • github.com/opetrenko-ml

SUMMARY

ML engineer with 3 years of experience in classical machine learning — mostly in retail and logistics domains. Strong with pandas, scikit-learn, gradient boosting. Comfortable with SQL and Python. No prior experience with banking or credit scoring specifically, but solid understanding of supervised learning fundamentals.

EXPERIENCE

Machine Learning Engineer | Magnum Cash & Carry

Feb 2023 — Present

- Built demand forecasting models for SKU-store pairs (~50K combinations) using LightGBM + time features.
- Reduced forecast MAPE from 31% to 18% via better feature engineering (lag, rolling means, seasonality).
- Designed assortment optimization model for new store openings using clustering + similarity matching.
- Worked with PostgreSQL and ClickHouse for data extraction, pandas for feature engineering.
- Productionized models via batch scoring on Airflow.

Junior Data Scientist | InDriver

Aug 2021 — Jan 2023

- ETA prediction models for rides using XGBoost.
- Driver-rider matching scoring (basic ranking models).
- Pandas, sklearn, statsmodels.
- SQL on Vertica for analytics queries.

TECHNICAL SKILLS

Languages: Python (3 years), SQL (intermediate-advanced)
ML libs: scikit-learn, XGBoost, LightGBM, statsmodels
Data: pandas, numpy, matplotlib, seaborn
Deep Learning: Basic PyTorch (read-level, did one Kaggle competition with tabular NN)
Databases: PostgreSQL, ClickHouse, Vertica
Tools: Jupyter, Git, Docker (basic), MLflow (basic)
Domains worked in: Retail demand forecasting, logistics (ETA, matching)
NOT worked with: Credit scoring, fraud detection, banking data — open to learn

EDUCATION

Tomsk State University (remote, completed in Kazakhstan)

BSc Applied Mathematics • 2017 — 2021

Yandex.Practicum

Data Science course • 2021

LANGUAGES

Russian — native • English — B2 • Kazakh — A2
