

Igor Yakovlev

Frontend Developer • Angular

Almaty, Kazakhstan • igor.yakovlev.fe@gmail.com • +7 705 411 67 89 • github.com/iyakovlev

SUMMARY

Frontend developer with 5 years of experience building enterprise applications with Angular. Strong expertise in RxJS, NgRx, and Angular Material. Looking for new opportunities in enterprise frontend development.

EXPERIENCE

Senior Angular Developer | Bee Telecom (B2B)

Sep 2022 — Present

- Lead frontend developer for the B2B portal (Angular 16, NgRx, RxJS, Angular Material).
- Designed and built a complex dashboard with real-time updates via WebSockets.
- Implemented OAuth2 authentication, role-based access control across 20+ pages.
- Optimized application performance: lazy-loaded modules, change detection strategy tuning, virtual scrolling for large tables.
- Wrote unit tests with Jasmine + Karma, e2e tests with Cypress.
- Code review, architectural decisions, mentoring two junior Angular devs.

Angular Developer | Kazpost

Feb 2020 — Aug 2022

- Built internal admin panels using Angular 10-14 with PrimeNG components.
- REST API integration with the .NET backend.
- Reactive forms with complex validation logic, custom directives, pipes.

TECHNICAL SKILLS

Core: Angular (5 years, primary — versions 8 through 17), TypeScript (5 years), JavaScript (ES2020+)

Reactive programming: RxJS (advanced — operators, custom operators, marble testing)

State management: NgRx (Store, Effects, Selectors), Akita (basic)

UI: Angular Material, PrimeNG, Bootstrap, SCSS

Forms: Reactive Forms, custom validators, dynamic forms

Testing: Jasmine, Karma, Cypress, Spectator

Tools: Nx monorepos, Angular CLI, Git, GitLab CI, Jenkins, Webpack basics

NOT my stack: React, Vue, Next.js (saw them in passing — not commercial experience)

EDUCATION

Almaty Management University

BSc Computer Science • 2015 — 2019

LANGUAGES

Russian — native • English — B2
